OBJECTIVE

I am good at analyzing problems and finding their solutions. I am looking for an opportunity to put this in a professional environment where I can not only test my skill but also boost this up to an extreme level.

I have vision to step-in and give my best to do something better to reduce the complexity of work. My main goal is to take modern technology into surroundings. I can use my time and energy to give the best of my work.

Keen interest of any type of Web development job, especially frontend.

JOBS & EXPERIENCE

SEO Consultant, SEOGA (January 2022 – on going)

My responsibilities here are to check and manage the google scores on sites our customer provide. Usually do on page & off page SEO, key word research and Back linking etc. Use of different type of tools for all the related work.

Web Developer, Lipsum Technologies (March 2021 – January 2022)

Joined as a fresh web developer and learn Shopify, WordPress, WiX and Custom theme development.

Worked on many websites as frontend developer and managed many themes.

Learned Core PHP development.

ACCOUNTANT, DENTAL WORKSHOP (2016-2021)

My job was to keep record of income/expense and other such paper work for a local small business.

SKILLS & ABILITIES

Web programing

- HTML, CSS, BOOTSTRAP, JS, jQuery and jQuery UI
- Core PHP

Database

- MySQL

Desktop Applications (CRUD)

- C# and JAVA

Basic Understanding of

- C++, Python, Django, APIs, Tailwindcss,

PROJECTS & LEARNING

I have completed the following projects (management/CRUD systems),

- [Management System for small Tailor Shop and integrated SMS API \(C#\) 2020](#)
- [Management System for Dental Workshops/Labs \(Java\) \(2018-2019\)](#)

My Final Year Project is about the Blockchain System for vehicle registration, that's why I have the knowledge of blockchain systems and crypto.

My recent personal work is converting [Management System for Dental Workshops/Labs \(Java\)](#) into web based SAAS using PHP I am currently working on it and making it more industrial standard.
